HOSPITAL MANAGEMENT

INDEX
— TO —
VOLUME XXIV
July to December, 1927

Supplement to HOSPITAL MANAGEMENT for January, 1928

Start Your Hospital Right in 1928!

Will your hospital go up or go down in public estimation in 1928?

It must do one or the other.

The best way to assure its progress is by seriously considering and acting on some way of encouraging the interest and support of the community.

Many hospitals find the best way to do this is by HOSPITAL NEWS.

They find it best from the standpoint of ethics, effectiveness, economy, and, above all, of convenience.

Perhaps some nearby or neighboring hospital is even now laying plans for a dignified, result-getting program of public education. When this is started, it will gradually cause wealthy and influential men and women, now not particularly interested in any hospital, to think and talk hospital service and hospital needs of the community in terms of this nearby institution.

When 1928, now starting, has run its course, there will be a number of definite and important results from this educational policy.

Hospitals have found it so easy to start and continue a real educational program by means of HOSPITAL NEWS that the number of communities in which a HOSPITAL NEWS franchise now is obtainable is rapidly decreasing.

Will your hospital go up or go down in public estimation in 1928?

Write today for sample copies of HOSPITAL NEWS and other information so that your hospital can make its decision quickly.
